

## Shoal Creek Watershed Action Plan Stakeholder Meeting October 23rd, 2020 @12pm Minutes

- Welcome & Housekeeping & Approve Minutes from 5.27 Mtg & 8.20 Mtg (Chris 5 mins)
  - Chris R made a motion to approve, Kasey F seconded it & All in favor adopt minutes from both meetings
- Introductions & Review Agenda (Ivey 5 mins)
- Nominations for new members: (Ivey 5 mins)
  - Nick Boysen, Pease Park Conservancy already said he was open to it, and accepted SCC's
    nomination as Secretary and member of the Steering Committee. Members give their
    unanimous consent, added as a new member.
- Officer Elections: (Chris 10 mins)
  - Nominees
  - Current Officers:
    - Chair, Chris Herrington nominated again, no opposition, approved by unanimous consent.
    - **Vice Chair -** vacant, no nominations
    - **Secretary -** nominate Nick Boysen no opposition. Approved by unanimous consent.
- Vote of <u>By-laws</u> edit (Nina- 5 mins) postponed discussion till next meeting but feel free to read this in the meantime.
- Confirm everyone has a copy of membership roles & By-laws and ask for signed Membership
   Agreements to be submitted. Sign and return by 10/30. (Ivey 5 mins) SCC will send out
   documents & request signed agreements by 10/30.
- **Funding**: (Nina) postponed till next meeting
  - Stillwater update

- o 319 grant update
- Year 1 Goals & Implementation Plans (Pages 2 & 3) & discuss specific steering committee
   member contributions for each member/sector (Nina 15 mins)
- Detailed breakdown of implementation of WAP into different phases, with each phase lasting 5 years. We are starting year 1 presently.
  - Year one activities tackle sources of E. coli bacteria in the creek. Biggest barrier to water quality in the creek.
  - Phase 1 and Year 1 activities selected for low cost, high impact
  - Structural BMPs definition "best management practices" or solutions to achieve goals in watershed plan. Anything we are going to build on the ground, like pet waste stations, rain gardens, grow zones etc.
  - Pet Waste Stations
    - o Currently, there are 17 pet waste stations in the watershed
    - o SCC has identified existing pet waste stations and priority areas for new stations
    - Goal to install 3 new stations during year 1. WPD has dedicated funding for up to 6 in year 1.
    - D'Anne are there existing trash cans near proposed locations for new pet waste stations?

    - D'Anne shared that 60% of poop bags are left along trails and in parks (not thrown away) even when trash cans are present.
    - Incorporate into education, only using a bag is not enough, also need to use the trash can.

 Linda - "No poop left behind" Hold a poop conference and find out why people don't follow through.

https://meet.google.com/linkredirect?authuser=0&dest=https%3A%2F%2Fwww.jeffco.us%2F416%2FMyth-of-the-Poop-Fairy

 D'Anne mentioned that the PARD Park Rangers are already running some kind of similar education program. Need to learn more.

## Grow zones

- The goal is to add 2 acres of Grow Zones to the watershed in the next year, on public and/or private land.
- Creekside Neighbors can help us identify homeowners interested in creating Grow
   Zones on their property. Linda needs to be really easy to share the information, does
   it cost, what does it involve, timeline, requirements.
- o D'Anne property owners could create a Grow Zone and dedicate the land to the city as parkland, comes off their property tax, would be open to the public and would need to allow the public to access it. This works best if the land is already adjacent to parkland already. Townhomes at 38th Street, could approach them, currently no conversation has been had between this property owner and the city.
- Nina- bridge at the grove, east side of Shoal Creek, will connect to state land, with a
  facility on it and a big field, where the bridge will come out. Maybe the state would
  commit to a grow zone and reduce mowing? Contact Jeff Howard to discuss.
- Linda suggested that we meet with a group of neighbors in a highly polluted area and share resources for Grow Zones and/or rain gardens. Getting 1 or 2 pilot properties will help with the promotion and excitement of other neighbors.

## Creekside Neighbors

 - opportunity to harness energy already there in watershed neighborhoods stewardship.

- Which neighbors want to take a more active role build toolkits top 3-5 items, that will help individuals slow the flow of water on their property. Best ways to reach people along the creek, communication methods to contact creekside neighbors.
- Linda Should have a program target the top ten houses/property owners and organize volunteers for homeowners to build rain gardens, etc.
- Discuss efforts around creekside encampments (Ivey 5 mins)
  - TOOF Contract
  - Trash bag program

Max Moscoe - The Other Ones Foundation and workforce first program - homelessness service nonprofit. TOOF offers programs to people experiencing homelessness, like showers, opportunities to work in their community for a living wage and interact with case workers. 5-8 ppl in a Workforce First crew can move 1000lbs of trash in a day, very effective in creek cleanups. Contracted with the city, work with PARD and WPD. Went 13 times in the last year to clean up along Shoal Creek. Pulled out 10,000 lbs of trash in Shoal Creek. Paid 8k in earned income. Over 70 people who have moved through the program have moved into stable housing. Contracts would have extra support for TOOF, can send them to specific places not supported by existing contracts. Extra benefit - outreach to people in the area. Contact Max at max@toofound.org and visit www.toof.org.

- Next Steering Committee meeting schedule (Chris & Ivey 2 mins)
  - Look for Doodle Poll/Email about next meeting
- Questions & final thoughts

The Shoal Creek Watershed Action Plan is a cooperative project funded in part by the Texas Commission on Environmental Quality (TCEQ) through a United States Environmental Protection Agency (EPA) grant.
